Hamamelis Virginiana Water Natural Skin Restoration Essence

Tannins, such as Ellagtannin and Hamalitannin, can regulate sebum secretion and have moisturizing and whitening effects. It has astringency and good antioxidant effect which can reduce skin swelling, itching and peeling issues, improve wound healing and calms the skin.

Hyalo-Oligo Moisturizing Essence

It is a nano-sized molecular weight new hyaluronic acid. Besides protecting the skin surface, it can penetrate and effectively stay in the cuticle. Even after washing, it can maintain and improve the moisture of the skin inside-out.

PENTAVITIN® Certified by ECOCERT and NATRUE (France)

It has a similar composition structure to the stratum corneum of human skin which can combine with the oxygen-based acid of the cuticle and firmly bind to the skin surface like a magnet. It can prevent the skin from losing moisture, and improve water absorption to dynamically maintain skin hydro-balance.
